Re: Joseph B. Gould
Phillips 32 # 6

November 30, 1984

SI-079579

Gentlemen:

Mr. Joseph B. Gould is requesting an approval for one-year venting of casinghead gas from his Phillips 32 # 6 Well. The well is located in the NW/4 of the NE/4 of Section 32, T25N, R3W, Rio Arriba County, New Mexico. The well was completed and ready for production on November 30, 1984. During a 3-hour production test taken on November 30, 1984, the well produced 30 barrels of oil and 8 MCF of gas, and 0 BLM. The gas-oil ratio was 322 cu.ft. gas/l BO.

The approval for venting is requested under conditions set forth by Part 644, Chapter 5, Item 3F of the Department of the Interior, Geological Survey, Conservation Division manual which states "...temporary flaring of gas production not exceeding one year may be allowed while evaluating reserves, awaiting pipeline construction, negotiating sales contracts..., provided total monthly per well gas flared does not exceed 10 MMcf".

This request for venting is necessitated by Mr. Joseph B. Gould's present difficulty in getting a gas pipeline installed. Northwest Pipeline Corporation will purchase the gas from the well, but the contract has not been amended and the weather conditions have prevented any construction operations. Although Mr. Gould is requesting permission to vent for a year, Mr. Gould is very confident that a pipeline connection will be made by July 1985.

As an action plan, Mr. Gould will continue to negotiate with Northwest Pipeline Corporation for the pipeline installation at the earliest possible moment, weather permitting. When the contract is amended and the weather permits the well will be tied into existing pipeline facilities in the area and venting will cease.

Respectfully,

R. D. Simmons

R. D. Simmons
Agent for Joseph B. Gould
