SHOOT OR ACIDIZE REPAIR WELL PULL OR ALTER CASING MULTIPLE COMPLETE CHANGE ZONES ABANDON* (other) Change of Plans Change of Plans Change of Plans Guerral OF LAND to all AGE DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)* Upon reviewing the open hole logs and considering that the NMOCD will not permit the Mancos and Dakota production to be commingled downhole and dually producing the Mancos and Dakota is not believed to be economically feasible, we have decided to postpone completion efforts in the Dakota at this time and complete only the Mancos interval. Since the Dakota has not been perforated and was properly cemented during the primary cement job, we plan to leave the well bore open in order to facilitate future operations in the Dakota at minimal risk in jeopardizing established production in the Mancos.
