(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The subject well has been adequately tested & proven to be non-commercial.

Refer to sundry notices of water shut off for cement data. Long string was cemented w/200 sks class "B" w/good circulation through out entire job. Calculation based on 75% fill indicate cement top to be 302' & 100% fill - circulated.

We propose to plug the well as follows:

- Spot 25 sk class "B" cement plug from 1500'-1700'.  
Spot 30 sk class "B" cement plug from 950'-1200'.  
Spot 10 sk class "B" cement plug from 0-60'.

Pump 5 sk class "B" cement in 4½" x 8 5/8" annulus.

Install dry hole marker.

Restore location to U.S.G.S. & BLM specifications.

Subsurface Safety Valve: Manu. and Type
