Re: Federal #3 L-34-25N-6W

Dear Ms. Linert:

The attached copy of a C-112-A form for the referenced well stated in the remarks that the well has no tubing. The last report we received on the well indicated that tubing was set at 6399'. Also, we do not have in our files a report of the pressure test that was requested in 1979.

Please recheck your records and contact this office about any changes.

Sincerely,

A handwritten signature in cursive script, appearing to read "Frank T. Chavez".

Frank T. Chavez
District Supervisor
