Gentlemen:

New Mexico Oil Conservation Commission Memo 2-65, which became effective
July 1, 1965, sets out certain requirements in regard to naming of leases and
numbering of wells in New Mexico.

We find that the wells listed below do not conform with these requirements and
must be changed. For minor changes, such as rearranging words or letters in
well names or deleting section numbers from well numbers, we will not require
refiling of Form C-104 but will use this list for file correction. If
refiling Form C-104 is required, the list so indicates opposite the well in
question. In the event an operator prefers to file Form C-104 to effect the
required change, he may do so.

Response of either agreement or objection is requested within ten days of this
notice. If response is not received within ten days, the indicated changes will
be made in commission records. Oil and gas transporters will be notified to also
make the indicated changes in their records. The changes should then be
incorporated into records used by the operator in filing Commission Form C-115
(monthly production report).

All future reports by the operator and transporter should use the exact names
of operators, transporters and leases.
