U. S. GEOLOGICAL SURVEY  
FARMINGTON, NEW MEXICO

INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA

**Jicarilla Apache "A" 118** Farmington, New Mexico July 31, 1962

Well No. 4 is located 1190 ft. from **N** line and 990 ft. from **E** line of sec. 36

**NE/4, NE/4** Section 36 T-26N R-3W N.M.P.M.  
(4 Sec. and Sec. 36.) Top Range Meridian)

**Gardian Pictured Cliffs** Rio Arriba  
(Field) (County or Subdivision)

The elevation of the derrick floor above sea level is 7499 ft. (RDB)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings, intervals mudlogging, cementing points, and all other important proposed work.)

As a result of not obtaining gas in commercial quantities, we propose to plug and abandon the Jicarilla Apache "A" 118 No. 4 as follows:

1. Pump 15 sacks cement plug on bottom (about 50-100' of fill up) and squeeze with minimum pressure.
2. Fill hole with cement.
3. Pump 20 sacks cement down 8-3/8" - 1 1/2" annulus (about 100' fill).
4. Cut off well head, set 5 sacks cement surface plug (0-60'), erect abandonment marker and clear up location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
