DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casing; indicate casing joints, cementing points, and all other important proposed work)

To drill a well to the top of the Picture Cliff formation, set production string and drill in with gas as a circulating medium.

To set approximately 150' of 10-3/4", 32.75# casing for surface pipe and cement to surface.

To set approximately 3000' of 7" O.D., 20#, J-55 casing for production string on top of the Picture Cliff formation and cement in accordance with the approved regulations and practices used in that area.

I understand that this plan of work must be approved in writing by the Geological Survey before operations may be commenced.
