Attn: Mr. P. M. Barry  
District production Superintendent

Re: Mobil #2 Jicarilla "B"  
19-26N-3W

Dear Sir:

We have just received four copies of application for dual completion of the above-named well. We are forwarding two copies of the application with exhibits to the Santa Fe Office, along with a recommendation for approval. Incidentally, on all future applications for administrative approval for dual completions, two copies should be mailed to this office and two copies directly to the Santa Fe Office.

In your letter of submittal you mentioned that you were submitting packer setting affidavit in lieu of the packer leakage test. Packer leakage tests are required on all dual completions regardless of the packer setting affidavit. The rule specifies that packer leakage tests must be started within 10 days after completion of the well. Will you therefore please immediately schedule the well for a packer leakage test.

Yours very truly
