(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the ~~derrick floor~~ above sea level is 7214 ft. grd.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to drill 1850' Gallup test. If Gallup unproductive, the Greenhorn, at approximately 2700' will be tested.

Surface casing will remain the same as on the original intent to drill. The production string will be set at approximately 2400' and cemented with 100 sacks cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations commence.
