SUNDRY NOTICES AND REPORTS ON WELLS

	i il		1
TICE OF INTENTION TO DRILL	•	QUENT REPORT OF WATER SHUT-OFF	
TICE OF INTENTION TO CHANGE PLAN		QUENT REPORT OF SHOOTING OR ACIDIZING	1117
TICE OF INTENTION TO TEST WATER		QUENT REPORT OF ALTERING CASING	
TICE OF INTENTION TO RE-DRILL OR	1 1	QUENT REPORT OF REDRILLING OR REMAIN	-
TICE OF INTENTION TO SHOOT OR A	1	QUENT REPORT OF ABANDONMENT	5 0 10
TICE OF INTENTION TO PULL OR ALT	ER CASING SUPPLE	EMENTARY WELL HISTORY	4-14-15
TICE OF INTENTION TO ABANDON WE	···		ON C
	S DY CHECK MARK NATURE OF		151.
VINDICATE ABOV	E BY CHECK MARK NATURE OF	REPORT. NOTICE, OR OTHER DATA?

ate names of and expected denting indicate muddling wish to deepen from the formation, expect	DETAILS OF Very peths to objective sands; show jobs, cementing points, and a present depth of 6811	work v sizes, weights, and lengths of proposed of all other important proposed work) P to 7525' in order to test (the .
ate names of and expected deprindicate muddling wish to deepen from the formation, expectation,	peths to objective sands; show jobs, cementing points, and a present depth of 682 and between 7350 and will be not and com-	work v sizes, weights, and lengths of proposed of all other important proposed work) P' to 7525' in order to test TS25'. If production is found	tino nd
ate names of and expected deprindicate muddling wish to deepen from the formation, expectation,	peths to objective sands; show jobs, cementing points, and a present depth of 682 and between 7350 and will be not and com-	work v sizes, weights, and lengths of proposed of all other important proposed work) P to 7525' in order to test (tino nd
ate names of and expected deprindicate muddling wish to deepen from the formation, expectation,	pths to objective sands; show jobs, cementing points, and a present depth of 6812 and between 7350 and will be not and composed work must receive approximately approximat	work v sizes, weights, and lengths of proposed of all other important proposed work) P' to 7525' in order to test TS25'. If production is found	tino nd
ate names of and expected deposite indicate muddling wish to deepos from the formation, expect the Dakete, 7° casing	peths to objective sands; show jobs, cementing points, and a present depth of 681 and come of work must receive approvaced.	work v sizes, weights, and lengths of proposed of all other important proposed work) P' to 7525' in order to test TS25'. If production is found	tino nd
ate names of and expected dependence indicate muddling wish to deepen from the formation, expect the Dakota, 7° eacing	peths to objective sands; show jobs, cementing points, and a present depth of 681 and come of work must receive approvaced.	work v sizes, weights, and lengths of proposed of all other important proposed work) P' to 7525' in order to test TS25'. If production is found	tino nd
ate names of and expected deposite indicate muddling wish to deepon from the formation, expectation, expectation, expectation, expectation, expectation, expectations may be commented to the formations may be commented to the formation of the fo	peths to objective sands; show jobs, cementing points, and a present depth of 681 and come of work must receive approvaced.	work v sizes, weights, and lengths of proposed of all other important proposed work) P' to 7525' in order to test TS25'. If production is found	tino nd
ate names of and expected dependicate muddling wish to despon from the formation, when the lakete, 7° coning in the laket	peths to objective sands; show jobs, cementing points, and a present depth of 681 and come of work must receive approvaced.	work v sizes, weights, and lengths of proposed of all other important proposed work) P' to 7525' in order to test TS25'. If production is found	tino nd
ate names of and expected deposite indicate muddling wish to deepon from the formation, expectation, expectation, expectation, expectation, expectation, expectations may be commented to the formations may be commented to the formation of the fo	peths to objective sands; show jobs, cementing points, and a present depth of 681 and come of work must receive approvaced.	work v sizes, weights, and lengths of proposed of all other important proposed work) P' to 7525' in order to test TS25'. If production is found	tino nd
