- TECHNOLOGY BLENDING INDUSTRY WITH THE ENVIRONMENT -

Well Name:	Candado #1
Well Legals:	Unit J, Sec 15, T26N, R7W
Pit Type:	Dehydrator
Horizontal Distance to Surface Water:	Greater than 1,000 ft
Groundwater Depth:	Less than 100 ft

RISK ANALYSIS

PNM requests closure of the Candado #1 using a limited risk analysis of the site conditions.

1. PNM estimated groundwater to be at a depth of 60 ft. based upon elevation of site to the Largo Wash. (Reference: topographic map.)
2. This site is not located within 200 ft. of a domestic water well and is not within 1,000 ft. of any other water source.
3. Distance from the site to surface water is greater than 1,000 ft.
4. PNM excavated 226 cu. yds. from the former pit. Bedrock was encountered @19 ft. below ground surface.

Based upon the information provided above, PNM believes the Candado #1 poses minimal risk to the environment. Subsurface lateral migration is limited based upon PNM's past experience in excavating 800 pits. Source removal minimizes the possibility of surface water contamination. Bedrock/sandstone provides a barrier between remaining contamination and groundwater. Vertical migration through bedrock or sandstone to groundwater is highly unlikely.
