(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

After extensive tests of Perforations this well was determined to be uncommercial in the Messverde formation and was plugged back to attempt completion in the Pictured Cliffs formation in the following manner. Cement plugs as follows 25 sacks from 5960-5685', 25 sacks 5685-5402', 10 sacks from 5065-4745' were spotted.

I understand that this plan of work must receive approval in writing by t	he Geological Survey before operations may be commenced.
