13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

As per conversation of Mike Rainwater with Mr. Charles Perrin w/NMOCC, Louis Dreyfus Natural Gas Corp. will monitor well as follows:

1. Open bradenhead to atmosphere for one (1) hour and estimate the volume of water discharged while monitoring and recording casing pressure during flow period.
2. Shut-in bradenhead valve and monitor and record bradenhead and casing pressure for 15 minutes. Report results to BLM.

We will notify the Farmington office of the BLM 24 hrs prior to flow test.

NOTIFIED TO OOD  
IN TIME TO WITNESS

14. I hereby certify that the foregoing is true and correct
