February 5, 1960

Well No. 11 is located 790 ft. from 1N line and 1280 ft. from 1E line of sec. 6  
SE/4 SW/4 Section 6 26N 6W NMPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
South Blanco Tocito Rio Arriba New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6558 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to convert the El Paso Natural Gas Products Co. Rincon Unit Well No. 11 to a water injection well. The tubing and formation packer now in the well will be pulled, the open hole cleaned out and a slotted liner set in the open hole. Tubing will not be rerun into the well. Water will be injected down the casing.

The proposed plan has been approved by the New Mexico Oil Conservation Commission on May 21, 1959, Order No. R-1191-A.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company El Paso Natural Gas Products Company

Address Post Office Box 1565

Farmington, New Mexico
