Farmington, NM 87401

Re: Jicarilla Apache 102 #4 K-4-26N-4W

Dear Ralph:

Annual packer leakage test on the referenced was inconclusive in proving zone separation.

Please reschedule and retest the well in such a manner as to prove zone separation. Shut in both zones for a minimum of 3 days. Blow the higher pressured zone to the atmosphere, or through the separator for as long as it takes to get a significant pressure drop.

Please advise this office at least 24 hours prior to test, so we may provide a witness.

Yours truly,

A handwritten signature in cursive script, appearing to read "Charles Gholson".

Charles Gholson  
Oil & Gas Inspector
