Mr. George Locke
1400 Luhrs Tower
Phoenix, Arizona

Dear Mr. Locke:

We have had a request from El Paso Natural Gas Company to have the King-Loc #4-17 MKL well removed from the proration schedule.

This well has not produced for over two years according to our records. We would appreciate any information relative to workovers or plugging that you may be able to extend at this time.

The well has had no allowable since April 1, 1955.

Yours very truly

A. R. Kendrick
Engineer, District #3
