If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was approved for comingling by the N.M.O.C.C. on March 10, 1976, by Order #R-5174. It is intended to remove the Baker EGJ packer, Otis side door choke and rerun the string of 2 3/8" tubing to be set at approximately 8300'. This will aid in fluid removal from the wellbore.
