Attn: Mr. Robert B. Tenison

Re: Deviation Survey of the #1-5 Hoyt
Located 1720' from the North line
and 850' from the East Line, Section
5-26N-4W, Rio Arriba County, N.M.

Dear Mr. Tenison:

The deviation survey tabulation for the above well has been received in this office. We have calculated the total drift to be 445.5'. The closest lease line from the surface location is 850'; therefore if all the drift is assumed to be in the direction of the nearest boundary line the bottom of the hole would be located 404.5' from the drilling tract boundary.

We therefore consider this to be a legal location and will not require that a directional survey be conducted.

Yours very truly

Emery C. Arnold
Supervisor, District #3
