If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

MKL 4-15 has not had any gas sales since May, 1971 when the well died. The well had been producing approximately 1000 MCF/Mo.

In July, 1971, the well was cleaned out to bottom and swabbed in an attempt to restore production. This effort was not successful.

DEPCO, Inc., requests approval to place the MKL No. 4-15 well on a temporary abandoned status pending evaluation of results of a recently drilled well, the Hancock No. 8R, Sec. 12, T27N, R12W, San Juan County, New Mexico.
