RE: M.I.T.'s on the following wells:

E. Puerto Chiquito Mancos Unit #24	F-06-26N-01E	30-039-08180
E. Puerto Chiquito Mancos Unit #2	G-29-27N-01E	30-039-82357

Dear Al:

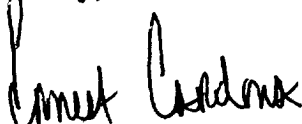

The NMOCD as part of its Underground Injection Authority, requires Benson-Montin-Greer Drilling Corporation to perform an M.I.T. on the injection wells listed above once every five years. M.I.T.'s are due on these wells on or before July 13, 1997.

The mechanical integrity of casing tubing annulus is tested by submitting the annulus to a minimum of 300 psi for 30 minutes with less than 10% bleed-off occurring, as outlined in Rule #704 of the New Mexico Rules & Regulations Manual.

The NMOCD requires a 48 hour notice so that we may be present to witness testing. All testing schedules should be coordinated through myself at (505) 334-6178.

Benson-Montin-Greer Drilling Corporation should also furnish any necessary personnel and equipment needed to contact the previously mentioned M.I.T. tests. If there are any questions please feel free to contact this office.

Sincerely,

  
Ernest Cardona  
Deputy O&G Inspector
