Unit L, Sec. 18, T 26 N, R 3 W
Rio Arriba County, New Mexico

Dear Mr. Porter:

We are requesting administrative approval to commingle liquid hydrocarbon production from the captioned well, which is a dual completion as an undesignated Gallup gas well and as a zone well in the Basin Dakota pool.

The gravity of the liquid hydrocarbons from both zones will be approximately the same, 55° API. The gravity of the commingled liquid hydrocarbon will be unchanged.

The value of the liquid hydrocarbon from each zone and the value of the commingled hydrocarbon are the same.

The Undesignated Gallup gas well will make approximately 100 MCF per day, with 20 bbl. liquid hydrocarbon per MCF, or an estimated 2 bbl. condensate per day. The Basin Dakota zone will make an estimated 500 MCF per day with 20 bbl. liquid hydrocarbon per MCF, or an estimated 10 bbl. condensate per day.

We are attaching a plat and schematic diagram.

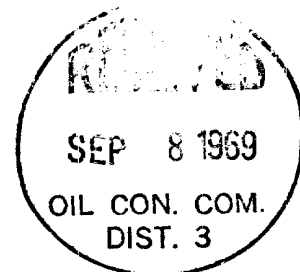

Sincerely,

Original signed by T. A. Dugan
