Dear Frank:

We have reviewed the gas production on our Jicarilla "H" No. 7 well which is now a commingled Dakota-Gallup. The well is located in Section 19, Township 26 N, Range 4W, Rio Arriba County.

We have encountered equipment problems since this well was commingled, so we only have two months of good production. Based on the months of January and February of 1982 compared with January and February of 1981 we feel that the following split on the zones would be reasonably accurate:

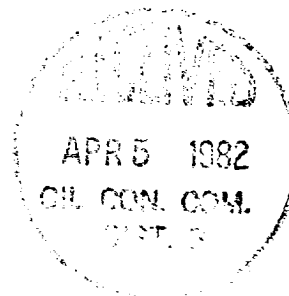

Dakota 65% of gas production
Gallup 35% of gas production

Enclosed are copies of the production cards.

Please let us know if this percentage split meets with your approval.
