SUPRON ENERGY CORPORATION

POST OFFICE BOX 808
FARMINGTON, NEW MEXICO 87401

December 2, 1981

Mr. Frank Chavez
Oil Conservation Division
1000 Rio Brazos Road
Aztec, New Mexico 87410

Frank:

K-19-26-4

We have reviewed the oil production on our Jicarilla "H" No. 7 well, which is now a commingled Dakota-Gallup, and have decided that the following percentage split between zones will be reasonably accurate.

<i>65%</i>	Dakota 40% of the oil
<i>35%</i>	Gallup 60% of the oil

We will install a plunger-lift system in December, 1981 in an effort to increase oil and gas production. We will contact you at a later date to determine how to split the gas production. At the present time the gas production is lower than it was before we commingled the zones.

Ken Kelly
