Dear Ken:

Annual packer tests (1984) on the referenced wells were inconclusive in proving zone separation.

Please reschedule and retest the wells in such a manner as to prove zone separation. Shut in both zones for a minimum of 3 days. Blow the higher pressured zone to the atmosphere for as long as it takes to get a significant pressure drop.

Advise this office at least 24 hours prior to test, so we may provide a witness.

Yours truly,

A handwritten signature in cursive script, appearing to read "Charles Gholson".

Charles Gholson
Deputy Oil & Gas Inspector
