*Unit P, Section 19, Township 26 North, Range 4 West, NMPM,
Rio Arriba County, New Mexico.*
*Blanco-Mesaverde (Prorated Gas - 72319),
Basin-Dakota (Prorated Gas - 71599) and
Tapacitos-Gallup (Gas-58090) Pools*

Dear Ms. Bradfield:

Reference is made to your recent application for an amendment to Administrative Order No. DHC-562 dated August 26, 1985, which order authorized the downhole commingling of production from the Basin-Dakota and Tapacitos-Gallup Pools in the wellbore, to permit the addition of a third zone of production to be commingled in the wellbore.

It appearing that the subject well qualifies for approval for such amendment pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above.

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

The applicant shall consult with the supervisor of the Aztec District Office of the Division upon completion and testing of the well in order to establish a fixed allocation of production from each of the commingled zones. Upon approval by the Division's District Office, the applicant shall submit the allocation formula to the Santa Fe Office of the Division.

REMARKS: The operator shall notify the Aztec District Office of the Division upon implementation of the commingling process.
