15. ELEVATIONS (SHOW DF, KDB, AND WD)
6669' GL

Since our last notice dated May 26, 1982, we have not been able to sustain production in the subject well. We request a 30 day evaluation period to determine which of the following courses of action we wish to take:

- 1) Repair casing and produce Dakota formation.
- 2) Repair casing, plug back Dakota and produce an upper formation.
- 3) Temporarily abandon the well by setting a bridge plug above Dakota and spotting 50' of cement on top or setting a cement retainer above Dakota and squeezing the same.
- 4) Plug and abandon the well.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.
