Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On February 3, 1984, a cement retainer was set @6768' to temporarily isolate a casing failure. Since that time we have evaluated the well and have determined that it will be permanently repaired by our drilling department. We request that this well be allowed to continue producing until it is repaired in order to keep the wellbore and producing formation cleaned up.
