☐ Water Shut Off  
☐ Conversion to Injection

13. Describe Proposed or Completed Operations

A confirmed casing leak has been isolated from the producing formation in the subject well by means of a packer and tbg. Due to pipeline contract delays, the well has not been allowed to produce and the well has not been evaluated. An additional six month test period is requested in hopes that the well can be properly evaluated and plans submitted to your office for repair or plug and abandonment.
