## 13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Operator requests a change in the plugging procedure that was originally submitted for this well:

1. Pump Class B cement into production casing from the surface.
2. Pump an adequate volume of cement to fill production casing completely from perforations to surface.
3. Pump adequate volume of cement into surface casing - production casing annulus to fill 50' below surface casing setting depth.
4. Set dry hole marker.
