13. Describe Proposed or Completed Operations

The subject well has a confirmed casing leak isolated from the producing formation by means of a pkr & tbq. The test period to evaluate the well for repair or plug and abandonment has expired and the pipeline company has not allowed us to turn the well to sales for a production test. While we are negotiating a sales agreement to test the well, an additional test period of six months is requested in hopes that we can properly evaluate the well.
