(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is intended to repair the casing failure by pulling the tubing and packer, setting a sand plug across the perforations, isolating the failure and squeeze cementing the leak with a sufficient amount of cement. Following clean out, the casing will be tested to 500 psi, the tubing and packer rerun and the casing - tubing annulus loaded with corrosion inhibitor.
