17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The following work was done per verbal agreement with the U.S.G.S. and Oil Commission.

6-3/4" hole was drilled with air to 8227 feet. At that point we had a burn-off leaving 7-1/2" drill collars in the hole. Top of the fish is 8009 feet. 4-1/2", 11.60#, K-55 casing was run from 7967 feet to surface. The Dakota zone will not be completed as was originally planned. At this time we have not determined which zone or zones we want to complete.
