Dear Frank:

We have commingled the Dakota and Mesaverde zones of our Jicarilla "F" No. 6 well, located in Section 34, Township 26 North, Range 4 West, Rio Arriba County, New Mexico.

The Dakota zone has never produced because of the quantity of liquids. We suggest that all of the increase in production be assigned to the Dakota zone.

Please review the production of the well and let us know if you agree with us on the production split.

Sincerely yours,

SUPRON ENERGY CORPORATION
