13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The MKL 14-8 was tested on pump from the Fruitland Coal in 2001 and was making too much water to be commercial. DEPI is working with Cauklins Oil to find a suitable well that could be converted for water injection in the Largo Canyon area. If disposal costs could be lowered significantly, then the well could be returned to production. Additional intervals in the Fruitland Coal are also considered prospective for completion at that time.

We would like a one year extension to pursue this option.
