

OIL CONSERVATION COMMISSION

1000 RIO BRAZOS ROAD

AZTEC, NEW MEXICO

July 23, 1964

Shell Oil Company
Box 1200
Farmington, New Mexico

Attn: Bob Kazarian
Division Production Superintendent

Dear Sir:

We received two copies of Federal Sundry Report on Wells
pertaining to your Carson Unit #11-13 located in Section
13-25N-12W.

Information contained on this form indicates that the casing
has failed. You have stated that no remedial action is
contemplated due to the fact that the production rate will not
justify repair work.

New Mexico Oil Conservation Commission rules require that
you either repair the casing in this well or permanently
plug and abandon it. In the light of the above information
will you please indicate what action you intend to take and
when such action will be taken.

Yours very truly

ECA:ks
