

LOG OF OIL OR GAS WELL

PLEASE REPLY CORRECTLY

(6-28)-(10-23) - 59 Recovered load oil.  
The information given herewith is a complete and correct record of the well and of work done thereon.  
10-27-59 Run initial potential test and recovered 26 bbls. 37.6° API  
60/60 oil and 1 bbl water in 24 hrs. GOR - 715/1. Well completed.

| DATE       | TIME     | DESCRIPTION                                                                                                                                                                                       |
|------------|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9-2-59     | 8 5/8 2h | Spudded well. Drilled 325' of 12 1/4" hole. Ran 8 5/8" 2h. J-55 csg and set csg at 315 w/225 sx cmt. Circulated cement to surface. WOC 24 hrs, nipple up, and tested csg to 1000# for 30 minutes. |
| 9-3-8-59   |          | Drilled 7 7/8" hole to 1953'.                                                                                                                                                                     |
| 9-9-59     |          | Set 1 1/2" 9.5# J-55 csg at 1958' with 300 sx. Pozmix cement. Cement top at 3850' by temperature survey. WOC 48 hrs, nipple up, and tested csg. to 1000# for 30 minutes.                          |
| 9-13-59    |          | Swabbed well dry.                                                                                                                                                                                 |
| 9-15-59    |          | Sand fraced well with 40,000 gal. oil and 40,000 lbs. sand in 3 stages with 2 stages of 90 balls each.                                                                                            |
| 9-16-25-59 |          | Swabbed and flowed load oil.                                                                                                                                                                      |
| 9-26-27-59 |          | Set pumping unit.                                                                                                                                                                                 |

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.
