Re: Bradenhead/Mechanical Integrity Tests

Dear Mr. Kuchera:

I am writing in response to your letter of March 19, 1986. It will not be necessary to conduct bradenhead/mechanical integrity tests this year on injection wells that passed those tests in 1985.

Upon review of NMOCD monthly reports, I have found that the three injection wells (WI-2, WI-21, WI-25) that you listed in your letter as inactive, have not been injected into for a period of at least six months. If at some later date you wish to recommence injection into these wells, it will be necessary to submit an application for injection (C-108) to the Division for approval.

Yours truly,

Carolyn J. Taplin
Field Representative
