March 13, 1959

Well No. 1 is located 660 ft. from N line and 660 ft. from E line of sec. 9

25 N. 10 W.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

San Jose
(Field) (County or Subdivision) (State or Territory)

The elevation of the ground level above sea level is 6645 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to reenter the El Paso Natural Gas Company No. 1 well and deepen this hole from the present total depth of 5785 feet to approximately 6650 feet to test the Isleta formation. If oil or gas production is indicated we propose to set 5 1/2" casing through the pay, perforate, and sandface. If Isleta gas production is discovered we propose to dedicate the north one-half of Section 9 to this well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
