DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is proposed to name this well CEU GI No.8 for inclusion as a gas injection well in the Central Bisti Lower Gallup Sand Unit. This well was formerly known as the Amerada-Ka-Da-Pa No.1. Conversion to gas injection was approved by New Mexico Oil Conservation Commission Order R 1414.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
