NOTICE OF INTENTION TO ABANDON WELL.....		

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

June 5, 1956

New Mexico Federal "C"  
Well No. 6 is located 1980 ft. from SE line and 1980 ft. from EW line of sec. 6  
NE SW Sec 6 25N 12W RMPM  
(¼ Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Disti Lower Gallup San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6211 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We spudded this well 3:00 P.M. 5-22-56 and drilled to 195'. We set 8-5/8" casing at 195' and cemented with 175 sacks cement of 2% gel & 2% calcium chloride. The cement circulated. After waiting for 24 hrs, the csg was tested to 1500# for 30 min with no loss in pressure.

We drilled 7-7/8" hole to 5000'; set 5 1/2" casing to 5000', and cemented with 200 sacks Pozmix. After allowing the cement to set for 48 hrs, the csg was tested to 1500# for 30 min with no loss in pressure. The top of the cement in the annulus is at 3750' by temperature survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
