DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In-Ni-De-Pah, Well No. 2, was spudded on December 26, 1957, and on December 27, 1957, 8-5/8" casing was set at 293' with 250 sacks of cement. After waiting on cement for twenty-four hours, casing and water shut-off were tested with 400 pounds pressure for thirty minutes, which held with no drop in pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
