Kelly State No. 11, Lease No. E-6597

This well was drilled in 1956. 5-1/2" production casing was set at 5014'. During completion the well produced considerable amount of water. The well was plugged and abandoned on August 13, 1956. None of the 5-1/2" casing was pulled.

During the recompletion the proposed program is:

- 1. Drill out cement plug in casing.
- 2. Make fluid check of perforations 4903 4909.
- 3. Re-perforate 4901'-4909' and flush with oil, if necessary.
- 4. Put well on production if zone perforated produces oil in sufficient quantities.
