July 14, 1956, 19

U. S. Federal #
Well No. 12 is located 140 ft. from N line and 600 ft. from E line of sec. 6NE 1/4 of SE 1/4 (1/4 Sec. and Sec. No.) 25 (Twp.) 12 (Range) 11 (Meridian)
Blanco (Field) San Juan (County or Subdivision) New Mexico (State or Territory)The elevation of the derrick floor above sea level is 6193 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

The well was spudded 6-10-56. A 12 1/4" hole was drilled to 191' and 8 5/8" casing set at 186' with 175 sack cement. The cement circulated. After waiting 24 hours for the cement to set, the casing was tested to 500' for 30 min.

A 7 7/8" hole was drilled to 4035' and 5 1/2" casing was set at 4033' with 200 sack. After waiting 24 hrs., the casing was tested to 1500' for 30 min. The top of the cement in the annulus is at 4035' by temperature survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
