May 24, 1956

N.M. Federal "C" lease
Well No. 3 is located 1960 ft. from N line and 660 ft. from W line of sec. 6
SW 1/4 NW 1/4 (1/4 Sec. and Sec. No.)
25N (Twp.) 12W (Range) RPM (Meridian)
San Juan (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 6199 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We drilled a 15" hole to 183'. Set 10-3/4" csg @ 177' w/200 sx of cement. Cement circulated back to the surface. After waiting 24 hrs for the cement to set the csg was tested to 1200# for 30 min with no loss in pressure. We then drilled an 8-3/4" hole to 5025' and set 5025' of 5 1/2" csg w/175 sx of 1:1 Pomix w/2% gel. After waiting 48 hrs for the cement to set the csg was tested to 1500# for 30 min with no loss in pressure. The top of the cement in the annals is @ 3850' by temperature survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
