IN REPLY REFER TO:

WI-2 Central Bisti Unit
3162.3-2 (7100)

Plugging Error:

Reference is made to your Subsequent Report of abandonment for well No. WI 2 Central Bisti Unit dated March 19, 2002. The amount of cement placed behind the 5 1/2" casing was calculated using 7 7/8" hole size instead of the reported (May 24, 1956 dated Sundry Notice) hole size of 8 3/4". It appears the cement has covered the tops of the Mesaverde, Pictured Cliffs and the Fruitland formations. Therefore remedial cementing will not be necessary. This serves notice that if this situation should arise again, you may incur an assessment and/or be required to re-plug the well.
