The elevation of the derrick floor above sea level is 6166 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to name this well GBU GI No. 2 for inclusion as a gas injection well in the Central Histi Lower Gallup Sand Unit. This well was formerly known as the El Paso-Benally No. 1. This well was approved for gas injection by the New Mexico Oil Conservation Commission Order R-1414.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
