OIL CONSERVATION COMMISSION

By

A. R. Fendrick

Kelly State No. 9, Lease No. E-6597

This well was drilled in 1956. 5-1/2" production casing was set at 4988'. During completion the well produced considerable amount of water. The well was plugged and abandoned on August 14, 1956. None of the 5-1/2" casing was pulled.

During the recompletion the proposed program is:

1. Drill out cement plug in casing.
2. Make fluid check of perforations 4874'-4894'.
3. Re-perforate 4874'-4894' and flush with oil, if necessary.
4. Put well on production if zone perforated produces oil in sufficient quantities.

March 1, 1964

Dear Mr. [Name]:
I am writing to you regarding the [Subject] which was discussed at the [Meeting] on [Date].

The [Subject] is a matter of [Importance] to the [Organization].

I am sure that you will find the [Subject] of great interest.
