April 23, 1956

N.M. Fed. "C" lease
Well No. 1 is located 660 ft. from N line and 660 ft. from W line of sec. 6

6 25-N 12-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
- San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6196 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We perforated the 7" casing with Lane Wells "E" gun using 6 shots per ft. from 1924 to 1952 Schl. measure. 2-7/8" tubing was run to 1942' and the well was started on production. The well flowed an average of 10 bbls. per hr. Drilling is now complete.

I understand that this plan of work must receive approval in writing by the Geological Survey before operation is commenced.
