17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The subject well is formerly Central Bisti Lower Gallup Unit Well No. 2 which was plugged back 7/27/76 and recompleted in the Pictured Cliffs Sand. The well's perforations 1125' - 35' tested only a small show of gas. It is proposed to abandon this zone by squeezing perforations 1125' - 35' w/50 sacks cement. We desire to maintain the wellbore at this time with the intention of drilling out cement and returning the well to a Lower Gallup water injection status within the next 12 months. Abandoning the well's Pictured Cliffs interval at this time will release the 160 acre tract for a replacement well to be drilled in the near future.

18. I hereby certify that the foregoing is true and correct
