17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The above well was completed and tested on 5-23-74. The initial test yielded 2 BO, 18 BW and 0 MCF in 24 hrs. This well has not been produced since then.

This request is being filed to obtain approval to temporarily abandon the well pending plugging operations. Because accepted cementing practices were used upon completions, the casing string should be in good condition, preventing damage to the Barker Creek formation, migration of hydrocarbons or water, contamination of fresh water or other natural resources, or the leakage of any substance at the surface.
